

TIBIALTUBEROSITY ADVANCEMENT; Dr Adrian Fleay at the University of Queensland learning the latest techniques in canine cruciate repairs.

A large class of veterinarians attended the 2-day course run by the university in conjunction with an orthopaedic specialist from the U.S.

Huntingdale Veterinary centre is proud to announce it has begun performing TTA's (tibial tuberosity advancements) for the repair of cruciate ligament injuries in dog's. So there is no longer a need to see a specialist and pay in excess of \$4000 to have your dogs cruciate repaired using the most up-to-date procedure
